

GABRIEL PAOLO I. BALTAZAR

Full-Stack Web Developer

[+63 976 573 7246](tel:+639765737246) | gpaolobaltazar@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Full-Stack Web Developer and Computer Science graduate who builds and ships production websites and web apps end to end — from responsive, brand-driven frontends to serverless backends, databases, and deployment. Comfortable owning the full pipeline: UI, API, data, testing, and production. Pairs strong engineering fundamentals with modern AI development tools to move fast without cutting corners on quality, accessibility, or performance.

WORK EXPERIENCE

Luxury Presence – *Junior Web Builder*

July, 2025 – July, 2026

- Build and customize responsive real estate websites, hand-coding layout and interactive sections in HTML, CSS, JavaScript, and JSON on a proprietary CMS.
- Translate client branding and design requirements into polished, high-converting, mobile-responsive interfaces for real estate agents and brokerages.
- Own frontend QA and optimization — cross-browser and device testing, layout fixes, and UX/performance improvements — ensuring consistency with brand standards.
- Collaborate with internal teams to ship pixel-accurate, user-friendly sites on fast-paced production timelines.

AIVARA — *Freelance GoHighLevel Funnel Builder*

Freelance | 2026

- Built automated webinar funnels (registration pages, reminder sequences, follow-ups, offer delivery) with attendee segmentation and personalized email/SMS automation.
- Configured CRM tracking and pipeline automation for lead monitoring and conversion management.

Clark International Airport Corporation — *Web Developer & IT Support Intern*

Onsite | December 2024 – March 2025

- Developed and maintained company web pages, implementing SEO-focused content and frontend improvements.
- Provided technical support for office systems and software troubleshooting across the organization.
- Maintained internal documentation and digital systems supporting day-to-day IT operations.

RELEVANT PROJECTS

GP Autocare — Personal Full-Stack Marketing Site with Serverless Lead Pipeline

HTML/CSS/JS · Supabase (Postgres) · Resend · Playwright · Doppler

- Built a multi-page marketing site from scratch in vanilla HTML/CSS/JS with a custom design system and persistent dark/light theming.
- Engineered an end-to-end serverless lead pipeline (Vercel function → Supabase Postgres → automated Resend emails) with fault-tolerant, no-drop submission handling.
- Added a scroll-driven canvas animation and admin triage dashboard, covered it with a Playwright E2E + browser-QA suite, and deployed to production on Vercel via Doppler.

GovCon Revenue Automation Platform — Client Project

Python · FastAPI · Flask · PostgreSQL · Docker · n8n · Grok (xAI)

- Built an 8-microservice platform that ingests federal contract awards, job postings, RFPs, and teaming signals into a unified sales pipeline with AI-drafted outreach.
- Implemented SAM.gov qualification (ICP filters), Grok-powered enrichment and contact discovery, and ZeroBounce email verification before queueing outreach.
- Shipped a Flask approval dashboard with suppression lists and ESP webhooks (Resend), orchestrated by n8n-scheduled workflows.
- Deployed to production on a Hostinger VPS using Docker Compose with Caddy for automatic SSL.

Additional Projects

- **Webinar Automation System (GoHighLevel)** — Automated webinar funnels with registration, reminders, follow-ups, and offer delivery; attendee segmentation and personalized email/SMS improved attendance and reduced manual follow-up.
- **Automated Client Onboarding (Zapier / HubSpot)** — CRM-triggered onboarding workflows automating folder creation, notifications, and task assignments across service pipelines; reduced onboarding time and improved operational consistency.

TECHNICAL SKILLS

- **Languages & Frontend:** JavaScript · Python · PHP · HTML5 · CSS3 · SQL · Responsive/Mobile-First Design · UX/UI & Design Systems · WordPress · Elementor · Custom Plugins
- **Backend, Data & DevOps:** Supabase (Postgres) · REST APIs · Vercel Serverless Functions · Flask · Docker · Git
- **Testing, AI & Automation:** Web QA · Claude Code · ChatGPT/Codex · n8n · Zapier · HubSpot · GoHighLevel

EDUCATION

Bachelor of Science in Computer Science

Holy Angel University | 2021 – 2025

- Consistent Honor Student
- Relevant Coursework: Data Structures, Web Development, Cybersecurity, Machine Learning
